MACHINERY FOR CRUSHING, GRIND-ING, AND TRITURATING wet, Granite, Flint, Concrete, Potters' Rough Stuff, Cemout, Chemicals, &c.,

Ores, and Amalgamating Gold

This apparatus, from Quartz.

This apparatus, from its many advantageous qualities, viz., Simplicity, Efficiency, and Cheapness,
combined with Superabundant Strength, is rendered
equal to the roughest work, likewise being comparatively
light and easy of transit. The machine stands alone and UNRIVA LED IN THE WORLD. If the material is no required to be reduced finer than rough sand, or fine gravel, it may be worked or purchased without the Trituator, the same only being used in the production of fine powder. Likewise, the washing or amalgamating dish will only be needed when ores and quarts are in question.

The importance attached to this Machine is, that it is not applicable to one object only.—Its advantages may be summed up thus:—

Int:—The crusher consists of a horizontal ram, mountal housely on an eccentric, by means of which a crush lat:—The crusher consists of a horizontal ram, mount of loosely on an eccentric, by means of which a crush ing and grinding movement is attained.

2nd—The material is reduced to its required size by simply setting the fixed face.

3rd—The two acting faces are moveable, and can be replaced in a few minutes at a triding cost, which doe not amount to one hundredth part the cost and trouble of rollers.

not amount to one hundredth part the cost and treuble of rollers.

4th—Where the triturator is required, the material passes over a vibrating sieve (as seen in the filustration), the fine falling through, and the coarse passing into the disc hopner, where it becomes reduced to powder.

5th—Where washing and amalgamating powers are required, the finely ground quarts is discharged into the dish containing quicksdiver, wherein water is constantly oured, the whole being stirred by means of routers, and the mud and taflings pass off into a sluice attached to the lip of the dish, intended to catch what precious metal may have escaped amalgamation.

It may also be necessary to state the Triturating discs are constructed in such a way as to admit of long wear, and will work to the last without the slightest injury to the quality or fineness of the material.

THE MACHINES ARE MADE IN THREE SIZES. THE MACHINES ARE MADE IN THREE SIZES.

No. 1. Crushing 20 tons per day of ten hours, Road metal No. 2. "40 "" Producing 4 tons of Quartz per 10 hours, No. 3. Crushing 60 tons per day of ten hours Producing 8 tons of Quartz per 10 hours. "The ram-head works against a fixed toothed face, and, if there were nothing more, stoues put into the hopper would be simply crushed between the two—much as in Blake's machine. But here the similarity ends. It has been found that what we may best ferm a chewing action materially facilitates the breakage of the stones, and this chewing action is obtained by mounting the ram-head and its thrust-har or handle on an ectentric close to the head. The motion statained by the use of this ecentric produces the precise effect required very efficiently. All the arrangements are very simple and mechanical, and the machine appears to have nothing about it to get out of order. We were much pleased with t."

The intimation contained in Sunday morning's issue of the Colonist is not the first hint that journal has given of an inclination on the part of certain persons to open up again the Scat of Government question with a view to its removal from Victoria, and although our contemporary affects to recate an agitation of the kind," few will entertain a doubt that, so far as the editor is concerned, the wish that it may be so is father to the thought. We can hardly believe that any number of members of the Legislature would entertain a proposition of the kind, should any one be found fool-hardy enough to make it. There may be those who think that Victoria is not the most suitable locality for the Seat of Government, but that a more central position would better subserve the interests of the Province as a whole; and that they have a perfect right to think so, we have no disposition to question. The wisdom of to Omineca. They are all busy making such a step, however, we do dispute.

In the first place the country is not in a condition financially to incur the expenditure which would necessarily follow the semoval of the capital to any other part of the Province. In New Westminster there are a few ricketty old buildings which were erected for the use of the Royal Engineers, the largest of which was at one time temporarily used as a Legislative Chamber, but that it is totally unfit for that purpose under the altered circumstances of the country at the present time, all will admit who know anything about it. Nowhere else could the capital be taken without an immediate expenditure of a very large sum of money in the erection of suitable public buildings and a residence for the Governor, that would be utterly inexcusable under almost any circumstances. but particularly so at a time when every dollar at the disposal of the Government R. R., and the transfer of freight and passenafter defraying the expenses of the gers. The recent arrangements by which trains are run on the bridge, it was supposed, trains are run on the bridge, it was supposed, the trains are run on the bridge, it was supposed, the contract of the contract construction of roads and bridges and would temporarily settle the matter but both other works of a public character parties continue the warfare with vigor. A dispatch from Council Bluffs to-night asserts necessary to the opening up of the that the lows road, fearing that they will on country and the development of its Monday remove their offices to the other side resources. In the second place, of the river, have issued orders to their agents the public buildings here, including to send freight and ticket passengers no tur-Government House, have been offered to the Local Government by the Govern ment of the Dominion to which they at prescat belong, to be used for the same pur-poses to which they are now devoted, and would it not be the very height of extravagant folly to decline their accept-ance, when they could not be replaced for a sum less than from \$75,000 to \$100,000? Do hon, gentlemen who talk of changing the location of the capital suppose that their constituents would endorse such a ion at so great a sacrifice ? We venture to say that scarcely a constituency in the whole Province could be induced to give its sanction to so absurd a measure. We do not, however, apprehend that anything serious will grow out to all this talk about the removal of the capital. Those who talk thus must be aware that it will require something more than a simple vote of the House to carry their desires into effect. Any serious attempt to carry out such a scheme would certainly find the island members-except it might be the member for Nanaimo-a unit in opposition to it, and wi h the Admin'stration and the Governor also against it, as they assuredly would be, we have no fears that the capital will be disturbed for many a long day to come. It is diffi-cult to anticipate what may take place in the distant future in reference to changing the capital of the Province. When the country becomes more thickly settled and communication more frequent and easy between the seaboard and the interior -when the railroad is completed and the distance between Victoria and Clinton or Lillooet can be made in as many hours as it now takes days to accomplish, and the financial condition of the Province is such that an expenditure of \$100,000 for public buildings can be made without detriment to other interests, it will be time enough to talk of removing the capital from Victoria; but until that happy period arrives, we think there will be little fear of the Seat of Government

being carried to the mainland. A. Dr. Ash reported from the Select Committee appointed to enquire into the charges of fraud a connection with the Yale-Cariboo waggon read; charges of fraud were not proved; Committee had not power to summon witnesses; with regard to Mr. T. Spence, the evidence proved him to be an honest and trustworthy officer of the Government.

Mr. Humphreys rose to a question of privlege with regard to the report. It was the first instance of such a course having been adopted in any legislature; there were no witnesses called. He demanaed that the report be not received by the House; that he be allowed and compelled to prove his assertions. He again would demand that it be sent back. What had the House to do with Mr. Tom Spence? He, Mr. H., was convinced that there was something wrong; he never men-tioned this man's name. This bill came up for second reading. Mr. J. P. Booth explained the provisions

Mr. Smithe seconded. Hon. Attorney General regretted to have to oppose the measure. The mover in his anxiety remove an evil has overlooked still greater evils which might occur should the proposed measure pass. By the section proposed to be repealed, -- it is only actual preemptors who can get the land; also the land must be in the locality where the person preempts. Considering the government is responsible, he did

not see that any legislation was necessary. The whole of the interior, the pastorial interests, would be materially affected by the ests, would be materially affected by the enactment of such a measure as is now proposed. In one or two districts perhaps there was a present evil, but it seemed to him, a transitory one. Mr. Humphreys replied; his remarks at the children were legimtismized under this bill time were statements made to him by parties legitimate children would be disinherited. He argued at some length in support of the views he held on this point, and cautioned the House against supporting the measure.

Mr. Booth, of Cowichan, rose to support the bill, notwithstanding what had been said by the Attorney General. It was intended to protect the rights of certain children born out of wedlock in this Province, which he thought should be dealt with by this House,

It dealt with two classes of persons, viz; the natural children of persons,who are now lawfully married, and the natural children of persons who may marry before the 1st of July next. As to the first class be saw no reason why they should not be put on be same footing, as far as the inheritance of their parents property goes. They may be as much the objects of parental love and care, as the children born in wedlock, and there is no reason why they should labor under a misfortune, for which they are in no way responsible. As to the second class, he thought the provision of the Act, a most beneficial one; it holds out to persons living in a state of concubinage, a very strong inducement to discontinue a state of things at once disgraceful to themselves, discreditable to the country,
